

# RiskXchange Managed Service

## About the Service

The RiskXchange managed service is an integrated solution designed to alleviate the burden of building and maintaining a cybersecurity or vendor risk management team within your organisation. It can also provide supplementary support to existing teams that may be understaffed.

The service includes advisory to your suppliers, annual assessment reviews and audits (if required), and suggesting potential remediation approaches to identified vulnerabilities. Additionally, the RiskXchange team assists with onboarding new suppliers and provides regular reporting to the customer.

## Third-party Onboarding

One of the service's key features is onboarding third-party vendors. RiskXchange will help you integrate new vendors smoothly, ensuring they align with your cybersecurity and compliance standards and practices.

This involves gaining visibility into the cyber posture, compliance and security maturity of these third-party suppliers, thereby enabling you to identify and address potential risks in a timely manner.

## Security Maturity Assessments

The service includes the provision of security maturity assessments, along with additional compliance-based assessments if needed. RiskXchange ensures that these assessments are completed punctually and provides comprehensive insights into the evaluation results.

Our team also offers your third parties explanations and background information on the questions being asked during these assessments, ensuring they completely understand the cybersecurity and compliance status.

# RiskXchange Managed Service

## Managed Service Key Benefits

RiskXchange managed service is not just a solution; it's a partnership. The team works closely with your business and third-party suppliers, offering continuous support and adding value wherever possible. Many global organisations currently utilise this managed service, demonstrating its reliability and efficacy.

### ▶ **COMPREHENSIVE CYBERSECURITY MANAGEMENT**

The service provides a holistic solution for managing cybersecurity across your supply chain, reducing the complexity of dealing with multiple vendors and solutions.

### ▶ **EXPERT SUPPORT**

RiskXchange managed service employs cybersecurity and compliance experts who become an extension of your team, providing valuable insights and suggestions to improve your supply chain security posture and compliance.

### ▶ **TIME AND RESOURCE SAVINGS**

The managed service takes the pain away from recruiting, growing, and maintaining a cybersecurity or vendor risk management team within your business, which can be costly and time-consuming.

### ▶ **THIRD-PARTY VENDOR ONBOARDING**

The service helps onboard third-party vendors, ensuring they align with your cybersecurity standards and practices.

### ▶ **VISIBILITY INTO VENDOR SECURITY POSTURE**

RiskXchange offers visibility into the security maturity of your third-party suppliers, enabling you to identify and address potential security or compliance risks.

### ▶ **REMEDATION SUGGESTIONS**

The service suggests potential remediation approaches to identified vulnerabilities and exploits, helping improve your overall cybersecurity.

### ▶ **SECURITY ASSESSMENTS**

The service covers security maturity and compliance-based assessments, thoroughly examining your third-party cybersecurity status.

# RiskXchange Managed Service

## Why Choose the RiskXchange Managed Service?

### ✓ Expertise

You gain access to a team of cybersecurity and compliance experts who can help you navigate the complex landscape of cybersecurity risk and compliance.

### ✓ Efficiency

The service saves you the time and resources that would otherwise be spent on building and maintaining your own cybersecurity or vendor risk management team.

### ✓ Risk Reduction

By providing visibility into your and your third-party suppliers' cybersecurity postures, the service helps reduce the risk of security incidents.

### ✓ Compliance

RiskXchange helps ensure your organisation complies with various cybersecurity regulations and standards.

### ✓ Peace of Mind

With RiskXchange managed service, you can know that your third-party cybersecurity and compliance are being handled by experts, allowing you to focus on your core business activities.

## What our Clients Say

*"When it used to take weeks and in some cases months to complete lengthy third-party vendor assessments, it now takes us hours. RiskXchange has helped us to streamline the process, saving valuable time and money."*

Miguel Fiallos, CIO at the Salvation Army
